

## Incident Command Initial (formerly Crew Commander Incident Command Initial)

**DURATION:** 1 week fully residential (Pre attendance i-Learn training modules to be completed)

### PRE ATTENDANCE REQUIREMENTS

Personnel nominated to attend this course shall:

- Be medically fit in accordance to CAP 168 which now indicates that guidance can be made to C&LG entitled “Medical and occupational evidence for recruitment and retention in the Fire and Rescue Service” (relevant national standard for non UK students)
- Be capable of absorbing the course subject matter
- Be currently certified as competent in the Firefighter role.
- Completion of all i-Learn modules.
- Suitably competent to wear breathing apparatus

### AIM

The aim of this structured programme is to provide learning opportunities for personnel who may be required to support the Supervisor (Watch Commander) in effecting command and control at aircraft accidents/incidents.

### OBJECTIVES

The learning opportunities afforded by this SLP are designed to enable students to:

- Show leadership skills that relate to Aerodrome Fire Service operation.
- Define the role and responsibility of the Crew Commander within the incident command system.
- Explain their role in managing the safety of others.
- Demonstrate communication skills that effectively support their incident command role.
- Apply decision making principles whilst engaged in a command role during computer simulated scenarios and fireground practical exercises.

The programme is designed for personnel who are currently in a Firefighter role and have demonstrated Leadership potential.

Individuals will be assessed through written questions and observation of performance in a simulated command role.

On successful completion of the programme and the associated assessment process, the individual will be issued with a Certificate of Competence and a record of achievement relating to the relevant areas of CAP 699. The period of validity of the Certificate of Competence is 4 years.

## TARGET GROUP

This programme is designed for personnel with previous Aerodrome Fire Service experience and provides comprehensive instruction covering the role of Crew Commander including:

- Managing the safety of others
- Operational Incident/Sector Command
- Functional Leadership
- Operational Communications
- Effective Decision Making

## About IFTC

The International Fire Training Centre is a leading global resource offering an unrivalled range of specialist training, educational and consultancy services to the firefighting community worldwide.

We produce elite, fully accredited firefighters of the highest calibre who have the skills, knowledge and confidence they need to protect and safeguard your people, assets and reputation in even the most extreme environments. In addition to our world-class training and educational programmes, our international network of trusted and experienced fire specialists provides expert consultancy services to clients across the globe.

As a progressive, groundbreaking organisation we have built a proven reputation over three decades for sustained innovation, unparalleled industry knowledge, and customer service excellence that is second to none.
